

It's the passion, the understanding and the wanting to make a difference for students that really makes Lift Lessons stand out for me.

**Bukky Yusuf**, teacher, school leader & interim co-chair of the UK Government's EdTech Leadership Group

## Building vocabulary to lift learning

We are teachers collaborating with  
speech and language therapists.

We create inclusive evidence-  
based digital resources to  
empower students with the  
language for learning in science.

click for mind  
maps of key  
words

The resources have been  
designed to teach the most  
frequently used key words  
to help prepare students for  
the secondary curriculum.

The students that we think  
will benefit the most are in  
the final years of elementary  
to early secondary school.

## OUR PURPOSE

We believe that science should  
be accessible for all young  
people, and that this starts  
with the words that we use.

We want to ensure that all  
students are supported with  
the vocabulary to enable them  
to thrive in lessons.
